

Name: _____

Year: _____

Date: _____

Subtracting Single Digits from Two Digit Numbers (Using Number Lines) **ANSWERS**

Using number lines and partitioning numbers is helpful when subtracting one number from another.

Example:

$23 - 8 = \underline{15}$

$1) \quad 23 - 5 = \underline{18}$

$2) \quad 31 - 6 = \underline{25}$

$3) \quad 75 - 9 = \underline{66}$

$4) \quad 54 - 7 = \underline{47}$

$5) \quad 82 - 8 = \underline{74}$

$6) \quad 67 - 9 = \underline{58}$

$7) \quad 91 - 5 = \underline{86}$

$8) \quad 26 - 8 = \underline{18}$

$9) \quad 73 - 4 = \underline{69}$

$10) \quad 55 - 7 = \underline{48}$

$11) \quad 41 - 6 = \underline{35}$

$12) \quad 94 - 7 = \underline{87}$

$13) \quad 62 - 9 = \underline{53}$
